Choosing to study in Australia has been the opportunity of a lifetime, allowing me to experience something new and exciting.

Farah Farhana Binte Noor Hizam
Bachelor of Science (Molecular Biology)

Ranked 51st as measured by the QS World University Rankings. A degree from UQ shows you have achieved a globally competitive standard of excellence at one of the world’s most respected universities.

WHAT OUR STUDENTS HAVE TO SAY

Samantha Wong
Bachelor of Science (Food Science and Nutrition)

I chose The University of Queensland because, compared to the UK, Australia is geographically closer to Singapore which makes communicating with and commuting back home a lot easier. UQ offered credit exemption, thus I am able to complete my undergraduate studies in under two years rather than three without having to undertake a foundation program.

Furthermore, UQ is a well-recognised institution that is among the world’s top universities. While studying in Australia, it is generally more affordable to live in compared to Melbourne and Sydney.

During my first semester, I lived in a student accommodation in Brisbane. It was a trusted establishment and I did not want to commit to renting a place in Brisbane (i.e. signing paperwork and paying a bond) without knowing the rental rates and safety of the area better. It is important to inspect a place before committing and since time did not permit for me to do so when I came to Brisbane, staying in student accommodation was ideal for me. Subsequently, I moved out and rented an apartment that was not far from the St Lucia campus.

The best part about studying in UQ is having the freedom of living independently and meeting locals as well as other international students. The beauty of studying overseas is that you are exposed to new cultures and get acquainted with people from all over the world. Being from overseas, I feel that I socialise more whilst studying in Brisbane than if I were to study locally in Singapore.

CRICOS Provider Number: 00025B
At UQ you will get extensive practical
experience in disease, and how to apply this
knowledge in real-world scenarios. You will
learn to understand how the human body works, what goes wrong in disease, and how to apply this
knowledge in a clinical setting.

A major in Biomedical Science may
also be undertaken as part of master's programs such as the Doctor of
Medicine. This program also offers an
introductory research-based studies

Bachelor of Science (Biomedical Science)

**What you will study**

Biomedical scientists provide the foundation of modern healthcare, working with doctors and other healthcare professionals to diagnose, manage, and cure ailments. During your studies, you will investigate a range of issues, including cancer screening, drug development, and genetic counseling. You will learn to interpret and analyze data, develop experimental designs, and communicate your findings effectively.

**Career opportunities**

With a degree in Biomedical Science, you will have excellent career prospects in management, research, education, and specialized laboratory work, including roles in academia and research institutions, hospitals and research facilities, pharmaceutical and biotechnology companies, and government and cellulo design.

**SAMPLE COURSES**

- Biomedical Science
- Cells in Organisms
- Cell Structure and Function
- Development & Reproduction Genetics
- Genetic Counselling
- Human Anatomy & Physiology
- Microbiology
- Molecular & Cellular Biology
- Principles of Pharmacology
- Systems Physiology

**Credit**

UQ requires you to complete your diploma, including these courses in order to award you credit for the UQ courses listed at the bottom of each column.

**Using this schedule:**

1. Plan your diploma.
2. Send the column to your Education Agent for available credit for each UQ subject. If the subject you want is not listed, credit may still be available.
3. Talk to your Education Agent to use the international students/credit online.
